Office Action Summary	Application No. 10/582,734	Applicant(s) STEWART ET AL.	
	Examiner PRITESH PATEL	Art Unit 3763	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 and 15 are rejected under 35 U.S.C. 102 (b) as being anticipated by Marshall (US 5211628).

Concerning claims 1 and 15, Marshall discloses a syringe having a barrel, a needle mounting, a needle (32), a hollow piston rod, a gripper device (62), a gripper retainer (around 52), said needle mounting closing chamber on exit end, a body on a proximal side of said mounting engageable with a gripper device, a needle that moves inward after injection, and a resilient member in the form of a spring (Figs 1-3)

Concerning claim 2, Marshall discloses a gripper device closing an opening in a rear section of a mounting (Fig 2).

Concerning claim 3, Marshall discloses a spring engaging a mounting and urging said mounting into cavity (Fig 3).

Concerning claim 4, a gripper retainer engages a portion of said barrel at a forward end and wherein said gripper retainer attaches to a barrel after a stroke so that a rod is fixed to a barrel (Fig 3).

Concerning claim 5-7, Figs 4 and 5 disclose how a gripper device joins with a mounting to facilitate a mounting and needle entering a cavity.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 8-14 and 16-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marshall.

Concerning claims 8-14, it would have been obvious to one of ordinary skill to

include a cap at an end of a barrel to facilitate an adequate relationship for a mounting that is meant to retrieve back into a cavity and that a plurality of fingers on a mounting retainer engaging an actuation sleeve is common in the art.

Concerning claims 16-31, in addition to the above disclosure, Figs 1-5 reach the limitations of the claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PRITESH PATEL whose telephone number is (571)270-7025. The examiner can normally be reached on Monday-Friday 7:30Am-5:00PM, every other Friday off.
